

## Duck Boats

All of us have seen the video of the duck boat accident on the lake at Branson. Seventeen people lost their lives. The duck boat was originally designed to be a vehicle that could operate on land and in the water. It is a truck and it is a boat.

What past history tells us is it is not a very good land vehicle. Most of the accidents involving duck boats are on land. They are very hard to maneuver. They will drive up and down the road, but they are so cumbersome they are involved in many accidents with other cars on the roads.

From the video of the accident we can see it not a very good boat either. It has no ability to float if it takes on a very small amount of water. It capsizes and sinks if it takes on very much water. A duck boat is both a land vehicle and a water vehicle. But it is not a very good boat, and it is not a very good land vehicle either.

Jesus tells us in Luke 16:13 we are not designed to serve two masters. It is impossible for us to serve God and material things. It is impossible for us to serve God and Satan. We can try but we will fail just like the duck boats. We will not be any good at either one.

Raymond
